

PUJA FLUID SEALS PVT. LTD.

*Your
Dedicated
Sealing
Specialist*

AN ISO 9001 : 2015 CERTIFIED COMPANY

Your Dedicated Sealing Specialist

Oil Seals

'O' Rings

'X' Rings

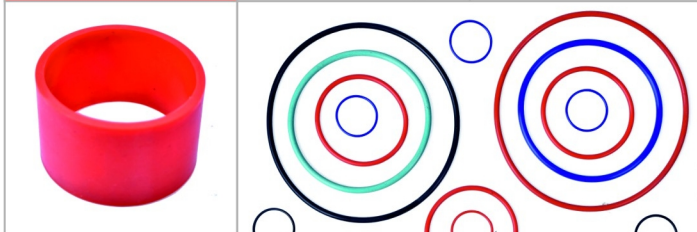

Hydraulic Seals

Pneumatic Seals

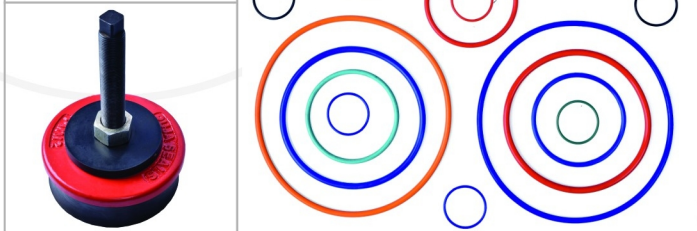

Diaphragms

Anti-Vibration Mounts

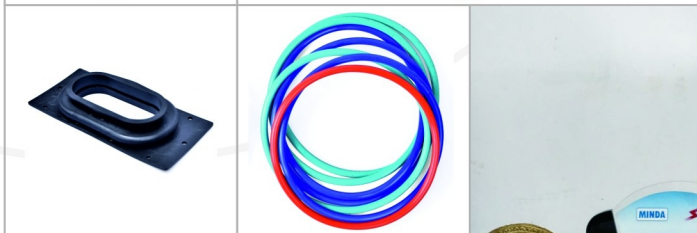

Rubber Moulded Products

Rubber Bellows

Rubber Dust Covers

Rubber Extrusions

Anti Vibration Mounting

We offer the wide range of anti vibration mounts suitable for the damping of internal vibrations of machine shocks and strokes. Levelling and adherence to floor as well as fast positioning to possibilities of machine mobility.

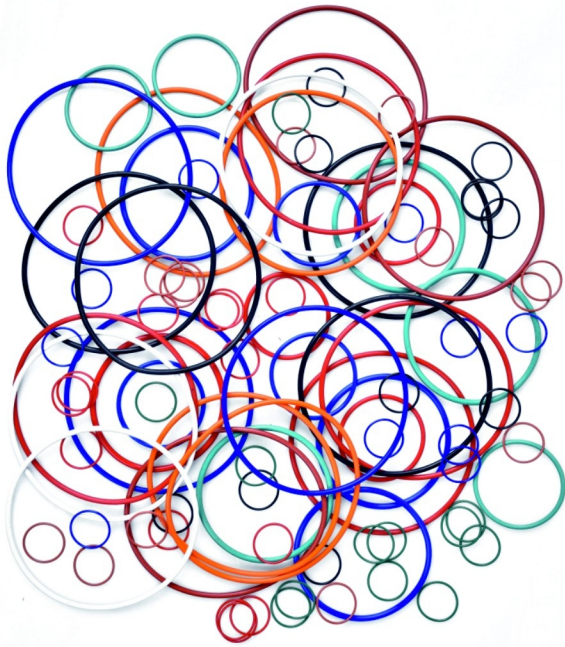

A wide range of sizes are available to reduce the vibration level and to provide damping.

Rubber Moulding

Our rubber moulded products are used in a variety of applications like Grommets, Sealing Rings, Caps and every custom made product we can advise on the most suitable compound.

O Rings

Whether your application is Imperial Standard Series of O-Rings in AS568 / British Imperial 1806 / British Metric 4518 / Swedish & French Metric R NPT47-501 / Japanese Standards J&P Series / ISO&DIN / Italia Standards available. With over 12,000 sizes in the range you can be sure to get desired size of O ring. All these sizes can be supplied in a range of shore hardness in materials like Nitrile, Fluorocarbon FKM / FFKM, AED, EPDM, Chloroprene, Silicone, HNBR, Polyurethane, Fluorosilicone, PTFE coated, PTFE Encapsulated, Aflas, or such specific seal polymers, Our O Rings are compliant with ROHS, Food Grade, REACH.

X Rings

Sized to fit standard O-Ring grooves, X Rings are ideal for reciprocating movement as they resist an O-Ring's tendency to twist or roll in the groove. Available in NBR, FKM / FFKM, EPDM & Silicone, Chloroprene.

Bonded Sealing Washers

Bonded Sealing Washers offers an ideal means of providing reliable sealing at both high and low temperature and pressure whilst also acting as an excellent pressure gasket to good work resistance range. A wide range of metal / rubber washers are available.

Vast range of bonded seals according to British Imperial / ISO1179-1173 / German or New PM1000 PM3000 Metric / French Metric to ISO R261 BS3643 standard are available in standard design or self centerizing designs in polymers like Nitrile / HNBR / FKM / Silicone / EPDM / Chloroprene.

Hydraulic & Pneumatic Seals

We believe, our range of Hydraulic & Pneumatic Sealing Products are the widest available, the fluid seals includes pressure seals for piston heads as well as gland housing with V Packing / Chevron Packing in fabric reinforcement. For low-pressure hydraulic and medium duty pneumatic applications a wide selection of U rings are available. Rod Seals are provided for mineral oil, water and oil emulsion for various pressure.

Rod Wiper Seals, Hat packing, X Seals, External Distributor Seals and Cup Seals for piston heads, Bucket Seals, Glyd Rings/Wear Rings complements this comprehensive range. Popular and widely used U-Cup Seals in Nitrile / FKM are available in largest range of sizes suitable for Hydraulic and Pneumatic application.

Popular and widely used Wiper Seals in Nitrile / FKM with or without metal castings are available in largest range of sizes suitable for hydraulic and pneumatic application against the intrusion of dirt.

Diaphragms

A wide variety of diaphragms made from a highly elastic elastomer materials like Nitrile, Chloroprene, FKM, EPDM, and PTFE are available. Diaphragms have the role of forming a sealed, yet easily mobile partition between two sealed volumetric areas.

A wide range of standard and custom made fabric reinforced diaphragm seals offers an ideal solution where accurate, consistent response is required for changes in hydraulic or pneumatic pressures with zero leakage, low friction and no lubrication is required.

Rotary Shaft Seals / Oil Seals

An immense selection of materials, sizes and types, ensure that we can satisfy almost any requirement.

Synthetic Rubber Seals are available in varying designs and in materials which includes Nitrile, Fluoro-elastomers FKM / FFKM, Silicone, Polyacrylic, PTFE, Fluorosilicone, EPDM, Chloroprene, etc.

V Seal for Shaft

V Seal is used for rotary shaft. These seals are mounted on shaft and rotates with the shaft. The moving conical sealing lip contacts as static seal. The seal while fitting is stretched on the shaft.

V Seal all Rubber Seals available in Nitrile and FKM / FFKM polymers in the types VA / VS / VL / VE / RM / RME / AX / LX for protecting shafts against penetrating impurities such as dirt, grit, sand, etc. V Seal protects bearings and can be used as a secondary seal to protect primary seal, which do not perform well in hostile environments.

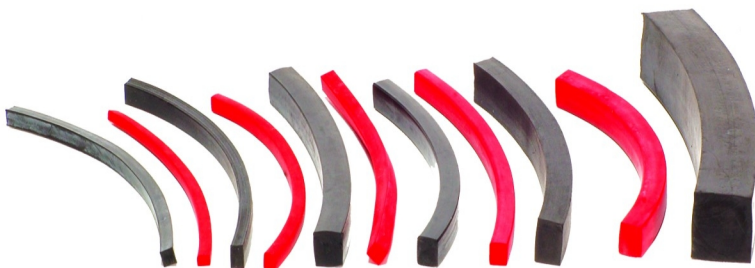

Rubber Bellows / Dust Cover

We produce a wide range of bellows / dust cover mostly custom made to protect from dust or contamination in different polymers.

Automotive Driveline Centre Bearing Rubbers

We are manufacturer of “Centre Bearing Rubber” and are supplying to leading propeller shaft manufacturers in India. Our products enhanced the durability and performance besides good damping properties. We have developed a wide variety with sound technical back-up hand holding with Tier II and OEM.

Rubber Extrusions

Rubber Extrusions in a multitude of cross sections for various purpose including Panel Gasket – Flame Resistant are available in the same range of rubber for a wide variety of sealing applications. U Cord, Rectangular and Square O-Ring Cords with single moulded joints.

Round Cross Sections available in the O-Ring materials and in any cross section dimension from 1mm upwards.

Tubing for any application including medical application manufactured according to your requirements in polymer like Silicone, Nitrile, Chloroprene, EPDM, Viton, SBR available.

QUALITY POLICY

We want to be India's one of the best manufacturer and supplier of "Rubber Components" using "Total Quality Commitment" to provide the skills to support profitable customer relationship.

We shall achieve this goal with Customer Satisfaction through Continual Improvement in all areas of operations with Quality, Productivity and Timely Delivery.

CUSTOMER SERVICE POLICY

We are the only manufacturer supporting to our customers for fastest possible developments, Prototype developments, Low to High Quantity, you can say one number.

Puja Seals An Associate of Shende Sales Corporation, Pune.

PUJA FLUID SEALS PVT. LTD.
YOUR DEDICATED SEALING SPECIALIST

: Work & Corporate Office :

"SEAL HOUSE", Plot No. SEI 6/1, Near W-12, MIDC, Bhosari, Pune - 411 026. India.
